adrop

PAY ONLY FOR VERIFIED HUMANS.

The ad network where every view is verified

Your on-chain data is public and it is being used

🔓 Every wallet, every trade, visible to anyone

🎯 Data companies and ad agencies use it to target you

Addressable × Polkadot: $144K of wallet-targeted ads on X, 161M impressions (2024)

Agencies pay for the wallet. The viewer gets nothing.

🏢 Agencies pay $1.86–3.12 per verified wallet

👤 The viewer earns $0

💸 Adrop moves that money to the host and the person

hypelab.com/blog/crypto-user-acquisition-cost-benchmarks-2026

Real humans. One SDK. Paid viewers.

🏢 **Agencies** pay only for verified humans. One person per view, no bots.

📱 **Host apps** add one SDK. Rewarded users opt in and stay.

👤 **Viewers** get a cut of every view they watch.

We don't sell data. We sell the proof.

📢 **An agency** funds one campaign with one payment.

👤 **A verified person** watches the ad in a host app.

✍️ **They sign the view.** That signature is the receipt.

Adrop keeps a small fee.

One campaign. Every app.

- App: one SDK, no placements, no ad ops
- Agencies: one console. AI agents: one x402 request
- One campaign reaches every app on the network
- The campaign follows the person, not the app

Market: crypto is the start

$781B digital ad spend, 2026	**$54B** out-of-home, $25.5B digital
$12.5B in-game advertising	**$1.2B** crypto ads: where we start
